

Installing CurinosConnect as an Office Administrator

CurinosConnect can be installed to appear in the ADMIN MANAGED section of the Office Add-ins modal (and does not require the Store to be activated for users)

Before you Begin

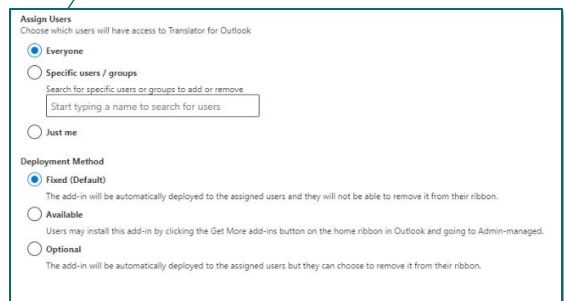

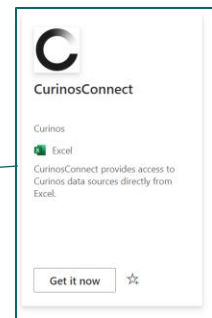

Permissions Required: Global Administrator or Exchange Administrator

See [Determine if centralized deployment of add-ins works for your organization](#).

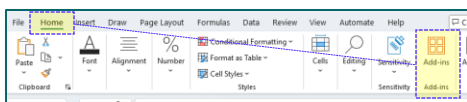

For general app deployment information visit [Deploy & publish Office Add-ins | Microsoft Learn](#)

Activation Steps

1. In the admin center (<http://admin.office.com>), go to **Settings > Integrated apps**
2. Select the **Add-ins** link near the top of the **Integrated apps** page
3. Select **Get apps** in the *Deployed Apps* section
4. Search for CurinosConnect and select “Get it now” and confirm any prompts necessary
5. Specify the users requiring access and select “deploy”
6. A green tick appears when the add-in is deployed. Follow the on-screen instructions to test. **Note:** Users may need to relaunch Excel and/or wait up to **72 hours** for the Add-in to appear.
7. When finished, select **Next**. You can always select **Edit Users** to deploy to more users.

Once enabled, CurinosConnect will appear for users in the ‘ADMIN MANAGED’ section of the Office-Add-ins modal, accessed from the **Home** ribbon, **Add-ins** button (“+ More Add-ins” for first time activation by users)

Possible step depending on configuration
